-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 13-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Wagner.

Wagner discloses a frame for a bicycle having front and rear wheels (2 and 4), a main frame support (1) and a pair of frame support arms (3 - i.e., the rear fork) movable to enable movement of the rear wheel from a use to non-use position (Figure 2), wherein the pair of frame support arms is mounted about an axis on the main frame parallel to the rear wheel axis (Figure 2), a seat tube having two locations for mounting the pair of frame support arms (5 and 11); each frame support arm being triangular (Figure 2); wherein both of the frame support arms are simultaneously pivotably moveable to position the rear wheel closer to the front wheel for compact storage (Figure 2); wherein the frame support arms are independently pivotably mounted on the

main frame support (on each side of the frame 1); a handlebar assembly (12); a quick release fastener (11) for the pair of support arms.

Allowable Subject Matter

Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it relates to a rear fork of a bicycle that is pivotable with respect to the main frame.
